## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 1

Total Mark : 10

Marks Obtained : 10

### Section 1 : Coding

#### 1. Problem Statement

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

#### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

#### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

**Sample Test Case**

Input: 3

29 37 45

Output: 0

**Answer**

// You are using Java

```
import java.util.Scanner;
```

```
import java.util.Arrays;
```

```
public class Main
```

```
{
```

```
    public static void main(String[] arg)
```

```
    {
```

```
        Scanner sc=new Scanner(System.in);
```

```
        int n=sc.nextInt();
```

```
        int[] numbers = new int[n];
```

```
        for(int i=0;i<n;i++)
```

```
        {
```

```
            numbers[i]=sc.nextInt();
```

```
        }
```

```
        int evenSum=Arrays.stream(numbers).filter(num -> num%2 == 0).sum();
```

```
        System.out.println(evenSum);
```

```
    }
```

```
}
```

**Status :** Correct

**Marks :** 10/10
