2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 12_Q2

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Alex is learning about Java's functional interfaces and lambda expressions.

He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

Input Format

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

Output Format

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 4
1 2 3 4
Output: 1 4 9 16

Answer

```java
// You are using Java
import java.util.Scanner;
import java.util.ArrayList;
import java.util.List;
import java.util.function.Consumer;

public class Main
{
    public static void main(String[] arg)
    {
        Scanner sc=new Scanner(System.in);
        int n=sc.nextInt();
        List<Integer> numbers = new ArrayList<>();
        for(int i=0;i<n;i++)
        {
            numbers.add(sc.nextInt());
        }
        Consumer<Integer> squarePrinter = num->System.out.print((num*num) + "
");

        numbers.forEach(squarePrinter);
        System.out.println();
    }
}
```

Status : Correct   *Marks : 10/10*
